

# BIB<sub>T</sub>E<sub>X</sub> styles catalogue for L<sub>Y</sub>X

John R Hudson

25th May 2017

## Preface

This catalogue groups the BIB<sub>T</sub>E<sub>X</sub> styles contained in the 2015 T<sub>E</sub>XLive distribution by their main characteristics; styles are presented in reverse date order within each group, with undated styles at the end of each group. The appendices list the various styles that can be used with L<sup>A</sup>T<sub>E</sub>X rather than L<sub>Y</sub>X and also those styles which, not being intended for use with specific L<sup>A</sup>T<sub>E</sub>X packages, did not work under L<sub>Y</sub>X 2.2, some because they need additional packages installed.

Note that

- some styles will work both with or without `natbib` but `natbib` has been listed only where it is essential
- not all styles appear in the L<sub>Y</sub>X BIB<sub>T</sub>E<sub>X</sub> Bibliography dialog; some have to be accessed by browsing to `~/texmf/bibtex/bst/`
- CJK styles are not considered and some styles may not be included in the default package installed on your computer
- this catalogue does not cover all the differences between styles but has been produced in the hope that it will enable people to narrow their searches for specific styles.

## A. $\LaTeX$ utility and other styles

### A.1. Adrconv

Adrconv is a collection of  $\text{BIB}\TeX$  style files to turn an address database stored in the .bib format into files suitable for printing as address books or included into letter classes like akletter or scletter2. Adrconv will sort the data either by name or birthday and create output files in various formats for address books or time planers (The  $\text{T}\TeX$  Catalogue Online).

## B. Styles not tested

### B.1. Abstyles

The adaptable family of styles were developed in 1992 to enable non-English languages references; they require `apreambl.tex` to be present to run and so have not been tested. Hans Hermann-Bode has written some `.bib` files (`acompat.bib`, `jourabbr.bib` and `jourfull.bib`) that contain compatibility commands for this family.
